STRYKR

BUILT AT INVESTMENT GRADE

Heavy-duty transit buses engineered for durability, safety, and long-term performance.

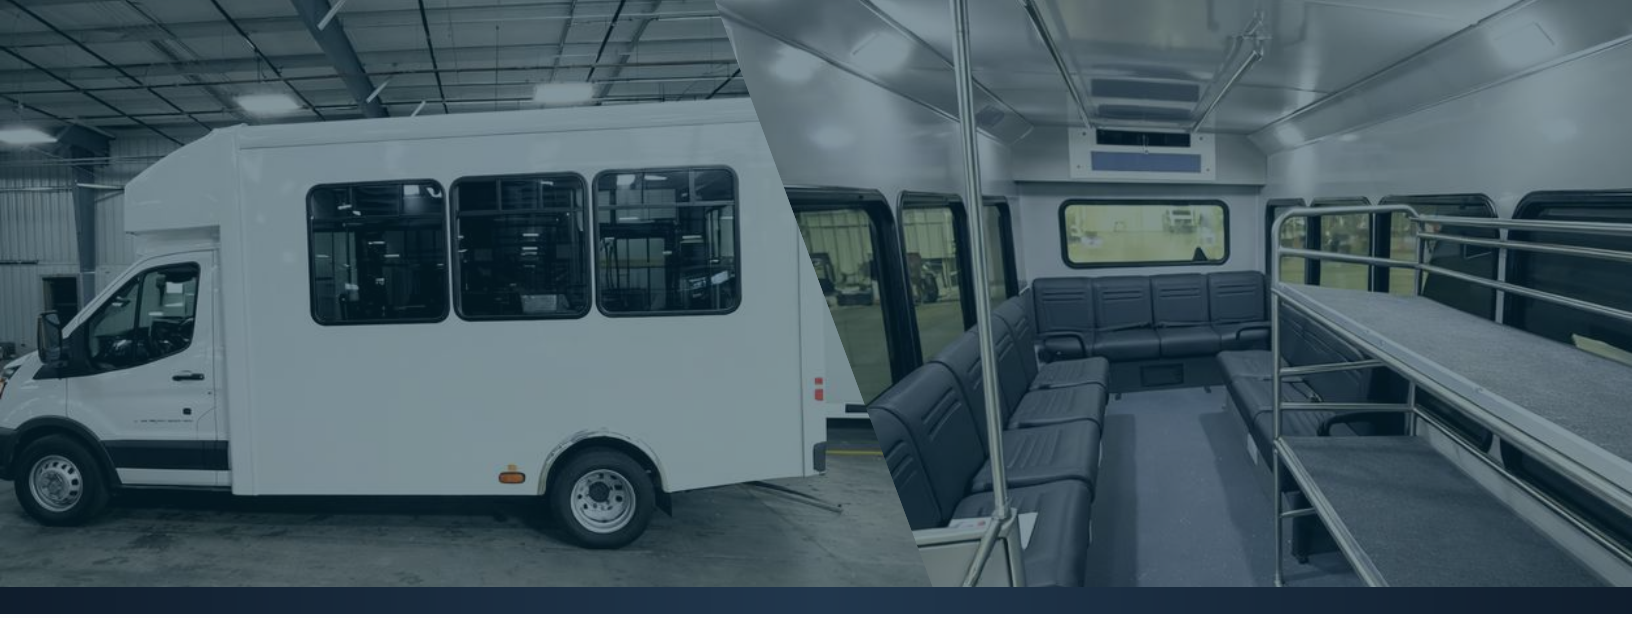
STREAMLINED PERFORMANCE. BUILT FOR RELIABILITY.

Efficient, purpose-built transit buses designed for dependable performance, simplified operations, and faster deployment.

STRYKR

HIGH LEVEL Enterprises

www.hleinc.net



Built for Operational Efficiency

STRYKR is designed to remove unnecessary variables — making it easier to deploy, operate, and maintain across your fleet.

Limited chassis options to simplify decision-making

Standardized components across builds

Single engine platform for consistent performance and servicing

Faster turnaround from order to delivery

Key Advantages

- Streamlined, Standardized Configuration
- Simplified Chassis & Powertrain Options
- Reduced Maintenance Complexity
- Faster Build & Delivery Timelines
- Built with Proven HLE Construction Standards

Less complexity. More consistency.

Proven Construction. Trusted Durability

Even with a streamlined platform, STRYKR maintains the core structural integrity HLE is known for:

- Steel cage construction for long-term durability
- Fully welded structural components
- Corrosion-resistant materials and finishes
- Reinforced body design for daily commercial use

Passenger Experience

STRYKR delivers a clean, comfortable, and functional passenger environment:

- Durable, easy-to-clean interior materials
- Slip-resistant flooring for safety
- Efficient interior layout for passenger flow
- LED lighting for visibility and energy efficiency
- Accessible entry and ADA configuration options

Safety & Reliability

- Back-up camera and alarm systems
- Reliable electrical architecture with proven components
- Consistent vehicle performance across fleet units
- Designed for predictable maintenance cycles

Built to perform — day in and day out.

Standardized Configurations

STRYKR focuses on core, high-demand layouts:

- Passenger configurations optimized for transit and shuttle use
- ADA-compliant options available
- Efficient seating and layout designs
- Focused offerings that meet the majority of operational needs

Target Use Cases

- Shuttle operators
- Non-emergency medical transport (NEMT)
- Senior living and community transit
- Hospitality and airport transport
- Government and municipal fleets

Customization (Focused & Practical)

STRYKR offers essential customization without overcomplicating the build:

- ADA equipment and wheelchair lifts
- Interior layout adjustments
- Branding and exterior graphics
- Key operational upgrades

Simplify Your Fleet Without Sacrificing Quality

7 Passenger 2 Wheelchair with 1 Single Foldaway

14 Passenger with Roadside Luggage

14 Passenger with Rear Luggage
